\$2990.00 REPLACEMENT VALUE

\$1950.00 INDEMNITY VALUE

This report has been prepared for insurance purposes only. This appraisal is not be used in any advertising or for re-sale of items. This valuation is carried out to the best of our ability using Gemmological instruments available to us, and is an expression of our opinion of a current normal retail price for a new item of this quality. It is based on current wholesale prices plus the normal retail markup for items of this nature. Actual retail prices may vary from this value. Indemnity value reflects any wear and tear that has occurred, and given the nature, age and condition of the item(s), and maybe considered as the basis for a cash settlement. Whilst all care has been taken in making this appraisal, no liability is accepted other than to the person to whom this certificate is given for any errors or omissions, including any liability to the person by reason of negligence. All values are given in New Zealand Dollars based on current market conditions.

Weight of stones where required are an estimate only unless they have been removed from the settings and specifically weighed. Diamonds will be tested by microscopic examination and diamond probe, and graded in their settings unless otherwise specified. Actual grades and sizes may vary due to the limitations imposed by settings and are estimated to the best of our ability. Unless otherwise stated all coloured gemstones are assumed to have undergone colour and or clarity enhancement treatments that do not require disclosure. Only treatments for which disclosure is required and that have been identified, are reported here. Some treatments require advanced testing to identify and may therefore not be reported. Actual size and colour of photographed items may vary due to enlargement and printing.
